ZGB AND ZGM HIGH TECH OVERSIZED PUTTERS

The ZGB-OS Blade and ZGM-OS Mallet are the best-designed high-tech MOI putters in the USA. Carbite feels that visible technology is very important in any golf product. At first you will notice the very attractive look, and just as important, the many high-tech features. The head weights are 355 grams, which will give you great clubhead feel through the stroke! Our beadblast, no-glare finish blends well with the precise placement of copper and gold-like tungsten inserts that give this putter a very cool look! The placement of all these metals gives strong stability at impact and you will notice a very solid feel and excellent feedback! Center, heel or toe hits will stay on line and roll the same distance.
